

SETTING UP YOUR STAR-TSP THERMAL RECEIPT PRINTER

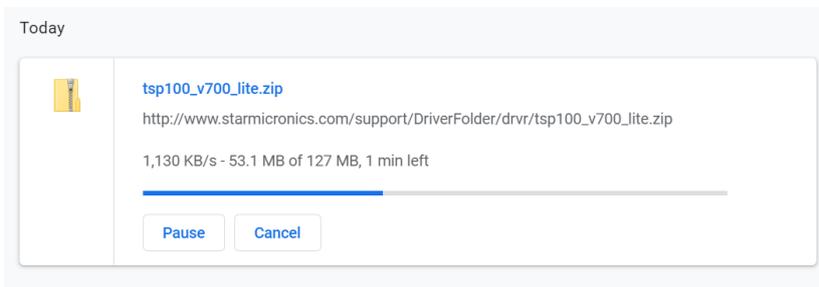

GOOGLE CHROME EDITION

1. INSTALLING THE PRINTER DRIVER:

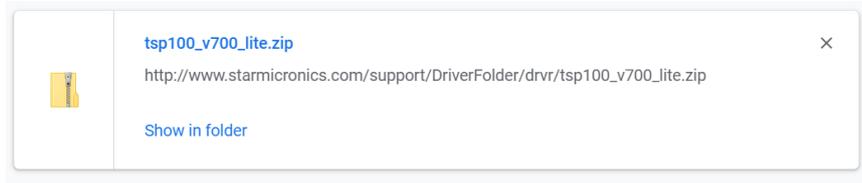

If you are using Windows Vista or Windows XP, click [here](#).

If you are using Windows 7, Windows 8, Windows 8.1, or Windows 10, click [here](#).

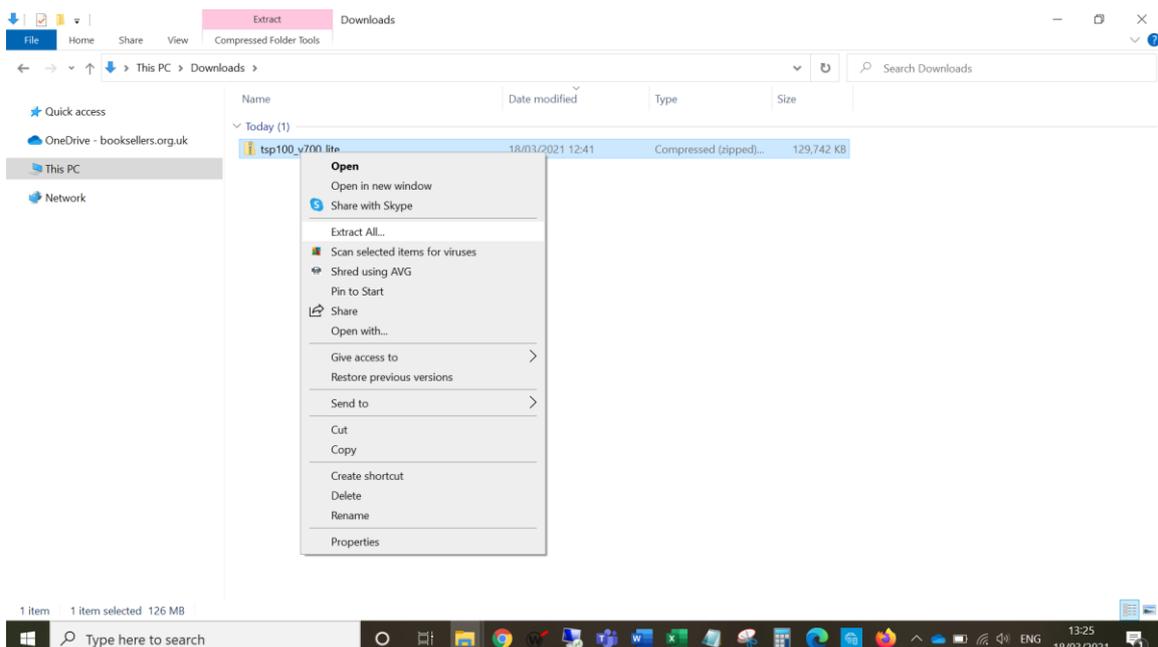

When you have clicked the relevant link, a zip file called **tsp100_v700_lite** (or something similar – the name may change with updates) should start downloading automatically:

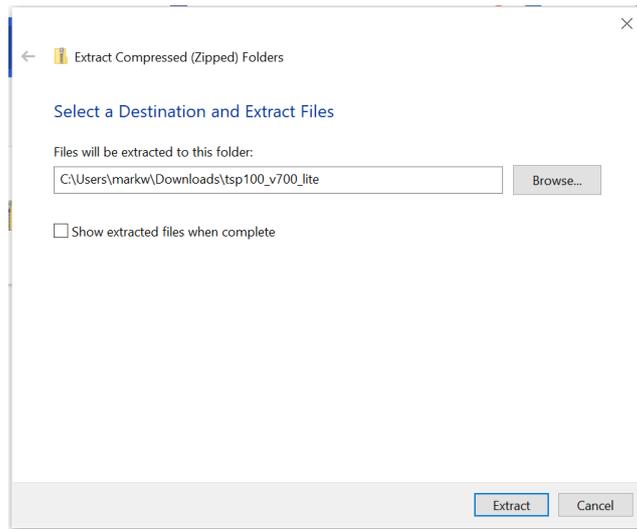

When the file has downloaded, click on 'show in folder' to open your downloads folder:

In the downloads folder, right click on the file and click 'extract all':

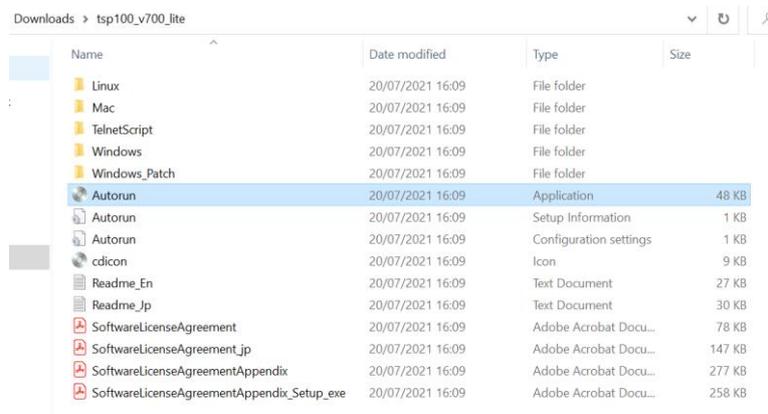

And then click extract:

When the extraction is complete, double click on the file folder to open it:

<input type="checkbox"/> Name	Date modified	Type	Size
▼ Today (2)			
tsp100_v700_lite	18/03/2021 13:06	Compressed (zipp...	129,742 KB
<input checked="" type="checkbox"/> tsp100_v700_lite	18/03/2021 13:31	File folder	
▼ Earlier this week (1)			

When in the folder, double click on the 'Autorun' application:

This will open the following program:

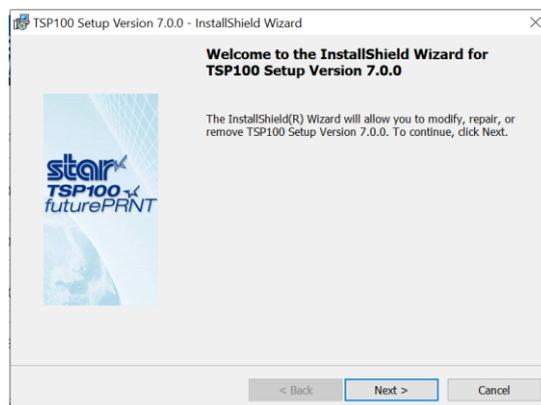

Click on 'Installation', and then 'I accept' below the Installation Agreement:

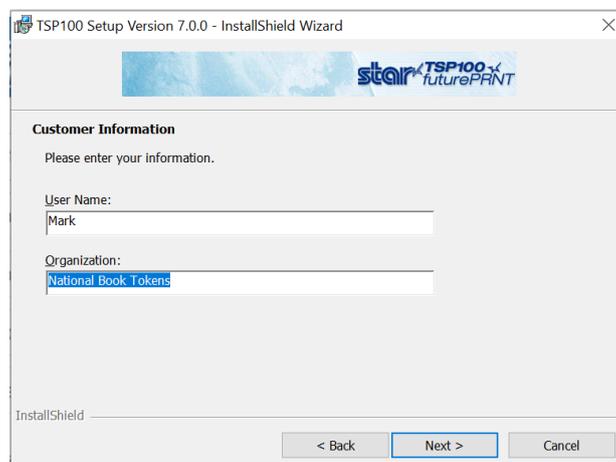

Select 'Yes' in the pop-up window asking if you want to allow this program to make changes to your device. The install wizard will then download.

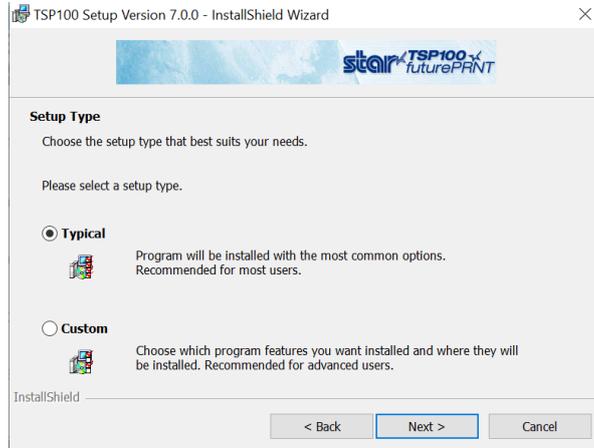

Click 'Next' when the install wizard pops up:

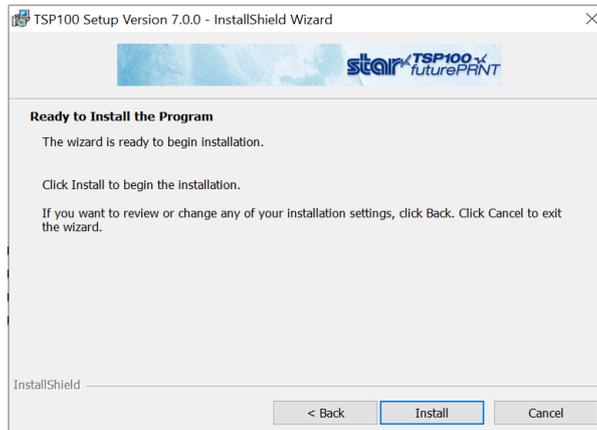

Enter your name and bookshop name (or enter anything/leave blank) and click 'Next':

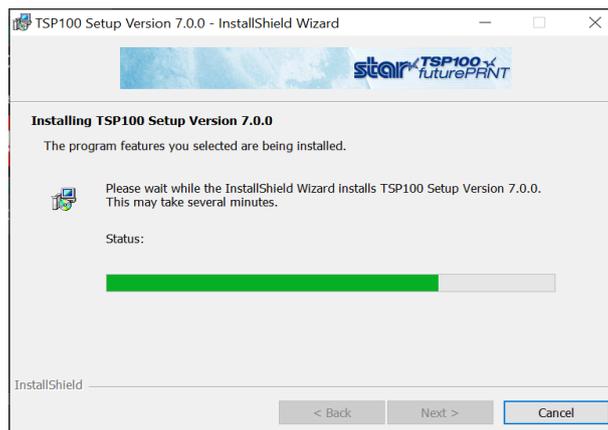

Select 'Typical' for set up type, then click 'Next':

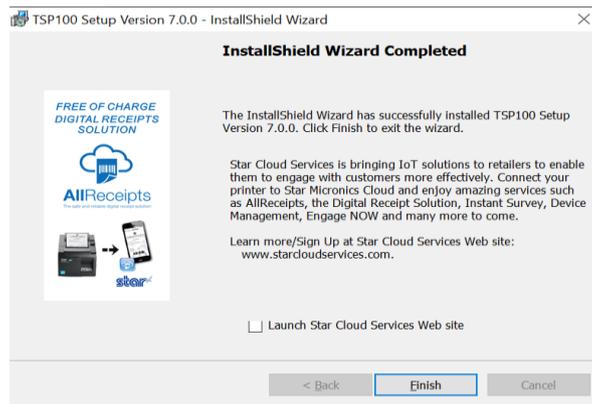

Then click 'Install':

Let the program install:

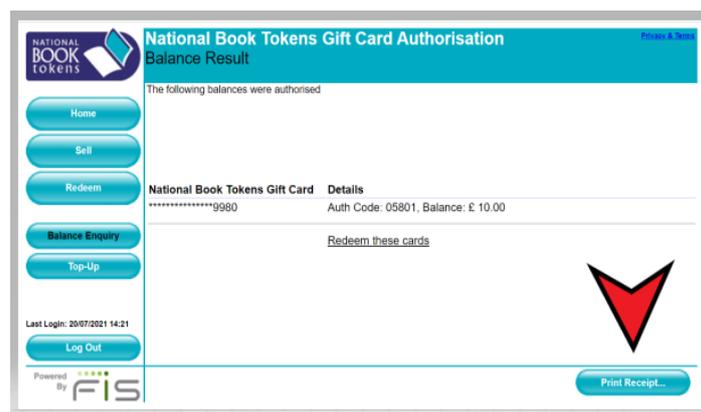

Then untick the 'Launch Star Cloud Services Website' box, and click 'Finish':

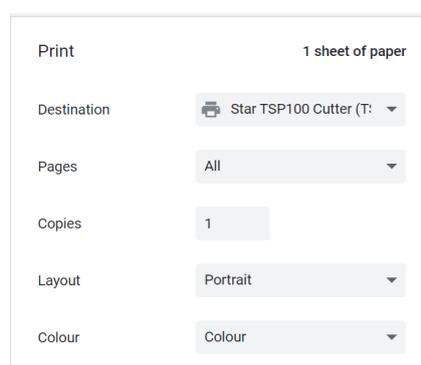

Once this is done, your Star-TSP printer is installed.

2. SETTING UP RECEIPTS:

Once you have performed a transaction on the Web Authorisations page of the NBT gift card web application (www.nationalbooktokens.com/giftcard), be it a sale, redemption, top-up, or balance check, you will see an option to print a receipt:

Once you have clicked this, expand the pop-up window to full-screen, and make sure the settings are as follows:

(Please note that it doesn't matter what the colour setting is on, however – it can be black & white if that's all you have.)

Then, click on 'More settings', and make sure the options selected in the dropdown menu are as shown in the image below:

More settings ^

Paper size 72mm x Receipt ▾

Pages per sheet 1 ▾

Margins Minimum ▾

Scale Customised ▾

100

Options Headers and footers Background graphics

Print Cancel

Then click 'Print'.

If no receipt comes out (and please bear in mind there may be a slight pause, especially on first use), you may need to change your default printer settings. To do this, search for 'Printers & scanners' in your windows search bar, open the window, scroll to the bottom, and then click to let Windows manage your default printer:

Let Windows manage my default printer

When this is on, Windows will set your default printer to be the one you used most recently at your current location.

If you then go back to the Web Authorisations page and print the transaction receipt again, you should end up with a correctly sized, fully readable NBT gift card receipt.
